

SUJAL JETHVA

Dallas, TX | (214) 899-7210 | jethvasujal86@gmail.com | linkedin.com/in/sujal-jethva-1116- | github.com/Suju75

Applied AI / LLM engineer with a strong analytics foundation and hands-on experience building evidence-grounded RAG, text-to-SQL, and LLM workflow systems. Built an evidence-grounded analytics assistant and shipped a multi-tenant iOS app; strong in Python, SQL, FastAPI, and BI.

EDUCATION

The University of Texas at Dallas — M.S. Business Analytics, AI Flex (GPA 3.4 · GRE 336/340) Aug 2025 – May 2027 · Dallas, TX

Veer Narmad South Gujarat University — Bachelor of Computer Applications Feb 2025 · Surat, India

EXPERIENCE

AI Specialist Intern *PROJXON (Business Optimization Consulting)* June 2026 – Present · Dallas, TX

- Built a four-part **Gemini AI-usage solution** covering 29 licenses across 6 teams: daily Admin Reports API pipeline, executive dashboard, custom “AI Usage Analyst” Gem, and CEO-facing 30/60/90 adoption plan.
- Automated a social-analytics pipeline across 3 brand accounts (Python + Meta Graph API → pandas → Sheets → Looker Studio), replacing manual weekly reporting with scheduled dashboards.
- Evaluated four LLM families (Claude, Gemini, Grok, GPT) against business use cases and standardized reusable prompts and workflows for team adoption.

Data Analyst *Bharat Futurist AI* June 2024 – June 2025 · Surat, India

- Analyzed 120K+ operational records with SQL (CTEs, window functions) and Python to build forecasting logic, improving accuracy 30% and supporting Director-level decisions.
- Automated SQL reporting pipelines across 5+ sources and built KPI-driven Power BI dashboards, cutting manual effort 35% and turnaround time 30%.

Software & Data Intern *TOPS Technologies Pvt. Ltd* Mar 2024 – June 2024 · Surat, India

- Built end-to-end full-stack web apps (Java, Spring Boot, React, MySQL) with RESTful APIs and dynamic UIs.
- Automated SQL reporting workflows and optimized complex queries, reducing manual reporting effort 60% and improving reliability.

PROJECTS

Analytics Copilot — *Python, FastAPI, Claude/Gemini API, PostgreSQL/pgvector, Streamlit* [GitHub](#)

- Built an AI assistant that answers plain-English business questions by routing each query to a SQL query, document search (RAG), or both — grounding every answer in evidence (SQL, data tables, charts, source links).
- Engineered a text-to-SQL layer with defense-in-depth guardrails (SELECT-only, read-only, timeouts, auto-retry) and semantic doc search over pgvector with local embeddings; validated with a routing / number-accuracy eval suite.

Indian Stock Selection Agent — *Python, LLM orchestration, Telegram* Private repo · available on request

- Orchestrated role-specific agents with separate screening, challenge, and decision responsibilities to move Nifty 100 candidates through quantitative filters and a devil’s-advocate scoring gate.
- Implemented explicit ship-gate logic to control false positives and delivered results through Telegram; paper-trading only, with no live capital.

The Gym Buddy OS — *React Native (Expo), Prisma, PostgreSQL, Docker* [App Store v1.0](#) · [thegymbuddy.in](#)

- Shipped a multi-tenant gym-management iOS app (owner / trainer / member roles) to the Apple App Store, enforcing strict per-tenant data isolation on every record.
- Built the backend API, role-based dashboards, and release pipeline (EAS builds, App Store Connect).

TECHNICAL SKILLS

AI / GenAI: RAG, LLM Tool-Calling / Function Calling, AI Agents & Automations, Text-to-SQL, Prompt Engineering, Vector Databases (pgvector), Embeddings & Semantic Search, LLM Evaluation & Guardrails, Claude / OpenAI / Gemini APIs

Programming & Backend: Python (Pandas, NumPy, scikit-learn), SQL (CTEs, Window Functions), Java, Spring Boot, React / React Native, FastAPI, Streamlit, REST APIs

BI & Data: Power BI, Tableau, Looker Studio, ETL, Data Modeling, KPI Reporting, Statistical Analysis, Predictive Modeling, Data Visualization

Tools & Databases: PostgreSQL, MySQL, Prisma, Docker, Git / GitHub, Google Apps Script, Meta Graph API, Excel

Certifications: Google Professional Data Analytics Certificate · Prompt Engineering for ChatGPT
